

**ROYAL COLLEGE OF SURGEONS IN IRELAND
DIPLOMA OF FELLOW OF THE FACULTY OF DENTISTRY**

PAEDIATRIC DENTISTRY

NOVEMBER 2017

PAPER 2

Examiners: Dr Patrick Fleming, Dr Kathryn Harley,

Time allowed for this paper – THREE hours

Please use a SEPARATE answer book for each question

Answer ALL THREE questions

1. Discuss the diagnosis and management of a carious non-vital primary molar tooth in a child.

2. Discuss the different measures which can be employed to prevent dental caries in children, 0 - 16 years of age.

3. Define interceptive orthodontics. Describe the appropriate interceptive procedures that can be carried out whilst the dentition is developing ie before the complete eruption of the second permanent molars, (0 - 12/13 years).
