**PAPER 2**

**November 2018**

**Examiners: Dr. Dympna Daly, Dr. David Finucane,  
Dr. Patrick Fleming, Dr. Kathryn Harley**

**Time allowed for this paper – THREE hours**

**Please use a SEPARATE answer book for each question and ensure your examination number appears on every book.**

**ANSWER ALL THREE QUESTIONS**

1. Discuss the role of a paediatric dentist in providing dental care for a child with a cleft lip and/or palate.
2. Describe, with supporting evidence, the process of assessing caries risk for a 6-year-old child.
3. An eight year old boy presents with MIH affecting all four first permanent molars and three of his maxillary anterior teeth. His mother is very concerned about the appearance of his " new second teeth". What reassurance can you provide this mother and what treatment would you recommend?

**END OF PAPER**
